Senior Project Engineer – Mechanical

Great Lakes Dredge & Dock (GLDD) Corporation is the largest provider of dredging, land reclamation and beach nourishment services in the United States, and the only U.S. dredging company with significant international operations. With the largest and most diverse dredging fleet in the U.S., Great Lakes serves a wide range of customers including the US Army Corps of Engineers; state, local and foreign governments; and private companies both internationally and domestically. Headquartered in Oak Brook, Illinois, GLDD has more than 200 pieces of dredging equipment located strategically throughout North America and in various locations throughout the world.

The Senior Project Engineer (SPE) will be able to take a project from conception to completion with little or no supervision. The SPE will be responsible for large capital and maintenance projects utilizing GLDD engineering staff, outside engineering sources, regulatory bodies, fabricators, shipyards and the purchasing department to the fullest extent. Safe, functional and cost effective designs are the SPE's goal for all assignments.

Responsibilities:

- Take any size project from conceptual design all of the way through final design and implementation including:
 - Identify work scope of projects and determine if the project should be handled internally or sub-contracted to an outside engineering firm
 - Develop conceptual designs
 - Schedule a project based on current resources
 - Manage outside engineering firms
 - Review and approve drawings
 - See projects through the ABS, USCG, and U.S. Army Corp. of Engineering approval process
 - Write specifications
 - Develop and maintain detailed budgets and schedules
 - Negotiate price and schedule with shipyards, fabricators and vendors
 - Oversee shipyard fabrications and installations when required
 - Assist in settling shipyard or subcontractor invoices
 - Work with Fleet Accountant for capital budgeting and reporting
- Mentor and guide project engineers, staff engineers, designers and draftsmen in all facets of vessel and mechanical design as well as project management.
- Report to the Project Engineering Manager or Chief Mechanical Engineer supplying regular status reports.
- Work with purchasing and equipment engineers in the procurement process to ensure technical and product quality.
- Maintain a high standard for equipment as set by Great Lakes Dredge and Dock, and regulatory bodies.
- Create designs with a commitment to the Incident and Injury Free (IIF) safety program.
