SAFETY WITHOUT COMPROMISE

Our 2022 began and ended as in years past with safety at the core of all we do. We published the third edition of our safety rule book, SALT (Save a Life Today), the year before and in 2022 we conducted a series of rollout workshops to our team members. Changes and updates to the third edition were highlighted, discussed, and workshop participants were tested to prove competency. The third edition of SALT included updates to our Safety Commitment Statement, Fall Overboard Prevention, Energy Wheel, and other areas to heighten hazard identification and prevention.

We continuously work to improve our safety culture and resources and we are glad to report that both our leading and lagging indicators are trending in the right direction. Continuous improvement of our safety culture extended to our participation in Construction Safety Weeksafety training and exercises, Construction Suicide Prevention Week-education and resources, and Construction Inclusion Week-through company-wide conversations leading toward alignment and improved diversity and inclusion in the construction industry.

Reducing our environmental impact will always be one of our key values. In 2022, Great Lakes Dredge and Dock invested \$4.5 million dollars to reduce emissions from the cutter suction dredge Carolina and the Company's largest booster station Buster, by installing selective catalytic reduction (SCR) systems. The SCRs are designed to treat the exhaust of the engines to reduce NOx

and particulate matter emissions. Retrofitting our equipment supports our goal of reducing our overall environmental impact as we strive to leave the areas we work in a better state than when we started. This aligns with our safety commitment to protect the environment by recognizing and mitigating environmental risks associated with our operations and our vessels.

We are always proud to be recognized for our safety culture and are pleased to have received the prestigious Signal Mutual Industry Safety Leadership Award, presented to us in January 2022, in recognition of outstanding safety performance for two consecutive years.

A special thanks to our team members who make all of the above possible with their dedication, conscientious efforts, teamwork, and commitment to safe operations wherever we work.

Lasse Petterson

David AhanA

Christopher Gunsten SVP, Project Services and Fleet Engineering

David Johanson President and Chief Executive Officer SVP, Project Acquisition and Operations

Great Lakes Dredge & Dock Company, LLC (GLDD) is the largest provider of dredging services in the United States and the only U.S. dredging service provider with significant international operations. GLDD owns and operates the largest and most diverse fleet in the U.S., and in its 133-year history, the Company has never failed to complete a marine project.

ELLIS ISLAND

The year 2022 was an exciting year for our company. We announced a new collaboration with the College of Engineering at Texas A&M University to provide funding and technical support for what will become the Great Lakes Dredge & Dock Laboratory of Dredging and Coastal Studies. Our new build program is on schedule with the new hopper dredge, the Galveston Island, expected to be sea ready for operations in the first half of 2023 and her sister ship expected to be ready for operations in 2025. We welcomed more than 200 new team members and announced a new operations leadership team.

The Dredge Ellis Island is the largest hopper dredge in the United States market, with a carrying capacity of 15,000 cubic yards.

In May of 2022, GLDD was selected to perform the subsea rock installation work for the Empire Wind I and II wind farms in the East Coast of the United States. Empire Wind I and II are expected to provide over 2 Gigawatts (GW) of renewable energy to the State of New York.

GLDD will use the first Jones Act compliant subsea rock installation vessel, currently under construction at the Philly Shipyard in the U.S., to install rocks to protect and stabilize monopile foundations, electrical substructures, and export cables at the offshore wind site.

On November 17, 2022, at the Ventus Gala in Washington, DC, GLDD received the prestigious Supply Chain Advancement Award for building the first U.S. flagged rock installation vessel and developing the U.S. supply chains required for building the vessel, procuring, transporting, and installing scour protection in the U.S.

"The Ventus Awards are the Business Network for Offshore Wind's highest level of professional recognition, celebrating the trailblazing people, companies, organizations, and work worldwide ushering in the global adoption of offshore wind energy. This award shines a spotlight on those who are making a difference in the world through their talent, drive, and commitment to advancing the offshore wind industry and improving the environment."

Pictured above: Houston Offshore Wind team members and the scale model of GLDD's subsea rock installation vessel for the offshore wind market under construction at Philly Shipyard, Philadelphia, PA. Also shown, the Ventus Award trophy, designed to represent wind and water.

PEOPLE

GLDD Southeast Region team members at the Ronald McDonald House in Jacksonville, Florida where they cooked a hot meal with dessert for children and families staying in the home.

Safety Leadership Team members Kasey Gallegos and Stephanie Espinoza visit the New Jersey Wind Port Project.

Nisha Patel-Abraham at the Houston me Food Bank. (July 2022) GLDD Southeast Region team members from the Nags Head and Avon Buxton Project visit to the North Carolina Aquarium at Roanoke Island.

ALC: NO.

Gulf Region and Houston headquarters team members gather with family and friends at Sylvan Beach, Laporte, Texas for the spring 2022 beach cleanup. (April 2022)

Gulf Region and Houston headquarters team members at the Houston Food Bank. (March 2022)

houston O

Anna Johnson, Rachael Violassi, Samantha Angell

Isis Quintana showing some of the school supplies the Southeast Region collected for their back to school drive in collaboration with the Boys and Girls Club in Jacksonville, Florida. (August 2022)

Gulf Region and Houston headquarters team members, their families, and friends, spent the day picking up debris at Galveston Beach, Texas for the fall beach cleanup. (September 2022)

Booster Buster Crew Safety Week | Rigging training completed

PROJECTS

Cutter Suction Dredge Carolina Deepening Houston Ship Channel

Cutter Suction Dredge Illinois Dredging Fire Island Inlet

ENVIRONMENTAL SOCIAL & GOVERNANCE

GLDD practices effective environmental, safety, social and governance processes in everything we do. Our business is focused on ensuring that our nation's shorelines are protected and potential risks associated with storms and sea change are mitigated.

Our people seek and develop technical innovations so that our work can be completed efficiently and responsibly, and we are committed to executing all projects with robust environmental and safety standards. To learn more about our ESG initiatives, visit gldd.com/ESG.
