**GREAT LAKES DREDGE & DOCK COMPANY**

# SAFETY WITHOUT COMPROMISE

GLDD has been focused on eliminating man overboard (MOB) incidents in recent years and have implemented many best practices and safe work tools that have helped reduce man overboard incidents by more than 50% over the last eight years. Our Man Overboard Working Team consists of a cross functional group with members from Safety, Operations, Engineering, and Procurement and continues to lead our efforts.

In 2023, we took delivery of the Cape Hatteras and the Cape Canaveral, the two Damen 3013 Multi Cats built by Conrad Shipyard in Morgan City, LA. Pipe handling and connection work can now take place securely on deck, which will greatly reduce the risk of man overboards.

The MOB training and drills our crew members receive keep them readily available to assist in any type of incident involving workers or even non workers in the water. In fact, in March of 2023, our dredge Alaska day shift deck crew members helped two jet skiers who had fallen in the water near the dredge and were struggling to stay afloat.

We are proud of our crews and team members for their continued commitment to safely work with each other and those around our operations. Their willingness to help others when they need it is often unnoticed, but occasionally recognition is offered.

As an example, in March of 2023, our company was awarded the American Waterways Operators American Waterways HERO Award, Recognizing Heroic Maritime Rescues, for our dredge crew, who while working on the Houston Ship Channel project in November of 2022 rescued three civilians from the water after their boat caught fire.

A special thanks to all our Team members who make all the above possible with their dedication, conscientious efforts, teamwork, and commitment to Safe Operations wherever we work.

**Lasse Petterson**  
President and Chief Executive Officer

**David Johanson**  
SVP, Project Acquisition and Operations

**Christopher Gunsten**  
SVP, Project Services and Fleet Engineering

Great Lakes Dredge & Dock Company, LLC (GLDD) is the largest provider of dredging services in the United States. GLDD owns and operates the largest and most diverse fleet in the U.S., and in its 133-year history, the Company has never failed to complete a project.

2023 was a challenging year for our company, but one that has allowed us to pivot and set the foundation for a bright future. As of the fall of 2023, we had secured a record backlog over \$1 billion with a diverse portfolio of dredging projects with Federal, state, and private contracts as well as continued success in booking work for our offshore wind market. Our major client, the U.S. Army Corps of Engineers, has improved their execution profile for dredging projects as they work with continued record funding, and we secured two contracts for major dredging at LNG facilities in Texas. One of those projects that will be the largest dredging contract in our history for the Rio Grande LNG facility in Brownsville, Texas. We will see benefits of our investments in new equipment, with the hopper dredge Galveston Island being delivered in 2023 and the Amelia Island in 2025 from a shipyard in Louisiana. Our rock installation vessel is being built in Philadelphia and will be delivered in 2025. Of course, one of the many highlights of the year was getting President Biden to personally lead our steel cutting ceremony in July and we were delighted to host Congressman Wesley Hunt on a dredge in Houston, and Congressman Aaron Bean on board a dredge in Kings Bay, Georgia.

The Dredge Ellis Island is the largest hopper dredge in the United States market, with a carrying capacity of 15,000 cubic yards.

On July 20, 2023, U.S. President Biden led the steel cutting ceremony for our rock installation vessel “Acadia” at the Philly Shipyard in Philadelphia, Pennsylvania. The event was well attended by much of the domestic offshore stakeholder community including many of the regulators and developers that are working to shape the future marketplace. The Acadia is a Jones Act compliant subsea rock installation vessel for offshore wind and the first ever built in the United States. The first projects the Acadia will service are New York’s offshore wind projects with Equinor and BP, Empire Wind I and Empire Wind 2. Another important milestone was the signing of the first ever subcontract for procurement of rock for a U.S. offshore wind farm with Carver Sand & Gravel LLC, a U.S. quarry in the state of New York which will be used for the New York projects.

We chose the name Acadia for our offshore wind vessel drawing from the natural energy of our extraordinary national parks. Acadia is the name of one of the top national parks in the United States, the Crown Jewel of the North Atlantic Coast. The park, located in Maine, protects the natural beauty of the highest rocky headlands along the Atlantic coastline of the United States, an abundance of habitats, and a rich cultural heritage. The subsea rock installation vessel will play a significant role in installing offshore wind farms and powering millions of homes with clean renewable energy produced by wind.

## DREDGE NO. 53

Up to 40 yd<sup>3</sup> (30 m<sup>3</sup>) Bucket Capacity | 2,250 hp (1,679 kW) Total Installed Power

## DREDGE NO. 54

Up to 50 yd<sup>3</sup> (38 m<sup>3</sup>) Bucket Capacity | 2,340 hp (1,746 kW) Total Installed Power

## DREDGE NO. 58

Up to 50 yd<sup>3</sup> (38 m<sup>3</sup>) Bucket Capacity | 3,000 hp (2,237 kW) Total Installed Power

## DREDGE NO. 55

Up to 40 yd<sup>3</sup> (31 m<sup>3</sup>) Bucket Capacity | 1,745 hp (1,302 kW) Total Installed Power

# SUPPORT EQUIPMENT

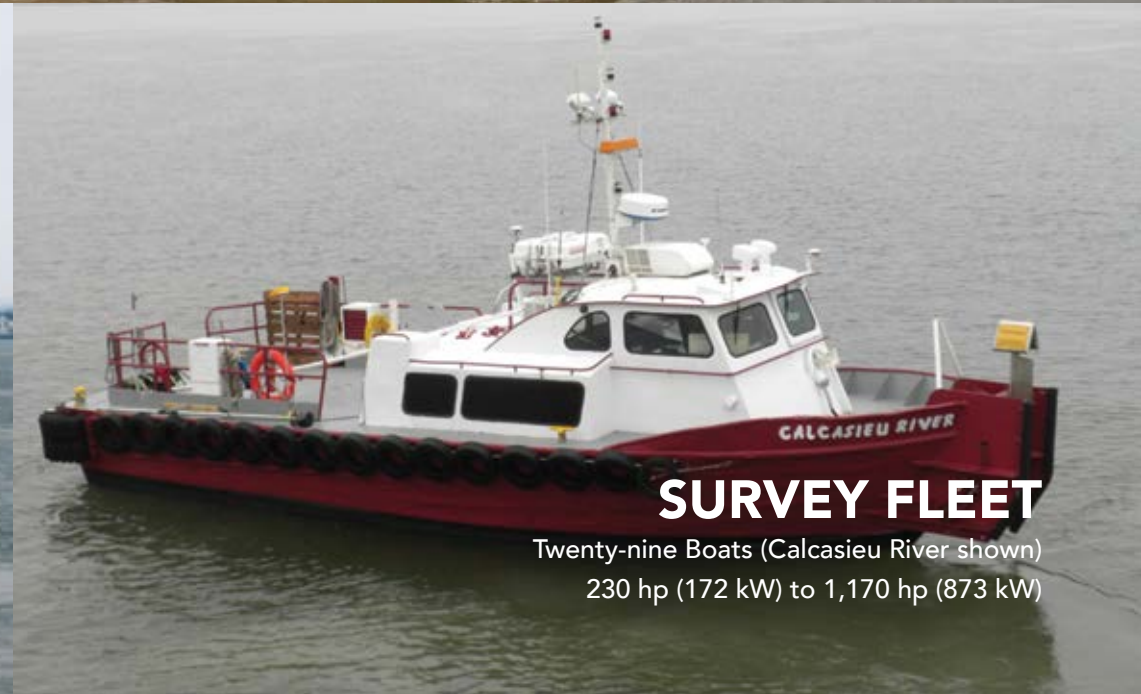

## MULTI CATS

Cape Hatteras and Cape Canaveral

## TUG FLEET

Six Tugboats (McCormack Boys shown)  
800 hp (597 kW) to 3,000 hp (2,238 kW)

## SURVEY FLEET

Twenty-nine Boats (Calcasieu River shown)  
230 hp (172 kW) to 1,170 hp (873 kW)

# AUXILIARY FLEET

## DRILLBOAT APACHE

Three 90 ft (27 m) Towers | Hydraulic Percussion Drills; Emulsion or Stick Explosives

## MATERIAL BARGE FLEET

16 Material Transport Barges | 3,000 to 8,900 yd<sup>3</sup> (2,295 to 6,820 m<sup>3</sup>) Size Range  
Hopper & Split-Hull Configuration

## UNLOADER NO. 2

24 in (610 mm) Discharge Diameter | 6,800 hp (5,073 kW) Total Installed Power

## SPIDER BARGE 175

30 in (762 mm) Discharge Diameter | Three/Side Six-Arm Arrangement

## **BOOSTER JACK (NO. 1)**

30 in (762 mm) Discharge Diameter  
3,600 hp (2,686 kW) Total Installed Power

## **BOOSTER CAPTAIN BARNEY (NO. 8)**

30 in (762 mm) Discharge Diameter  
3,600 hp (2,686 kW) Total Installed Power

## **BOOSTER ERIN (NO. 5)**

30 in (762 mm) Discharge Diameter  
3,600 hp (2,686 kW) Total Installed Power

## **BOOSTER JESSIE (NO. 2)**

30 in (762 mm) Discharge Diameter  
7,200 hp (5,371 kW) Total Installed Power

## **BOOSTER BUSTER (NO. 6)**

30 in (762 mm) Discharge Diameter  
14,400 hp (10,742 kW) Total Installed Power

## **BOOSTER TEXAS JR. (NO. 7)**

30 in (762 mm) Discharge Diameter  
3,900 hp (2,909 kW) Total Installed Power

## **BOOSTER REGGIE (NO. 4)**

30 in (762 mm) Discharge Diameter | 3600 hp (2,686 kW) Total Installed Power

## **BOOSTER NO. 9**

30 in (762 mm) Discharge Diameter | 3,600 hp  
(2,686 kW) Total Installed Power

# RIVERS & LAKES DREDGES
